DOT – Lyle Blackwood Spoke on the Harlem Bike Network whereas CB11 has approved the Bike Lanes, as well as CB10, CB7 has requested protected bike lanes. CB9 has a small portion for the bike lanes and giving where that section is DOT needs to take another look because there is not enough space for a bike lane.

A discussion regarding the Car Share pilot program. DOT representatives came before the committee in June of 2017 for a resolution for the Car Share program. It was the last meeting for the summer and requested that DOT return in September. DOT never return to the committee and no resolution was ever given. DOT them put online maps whereas community residents could on to give the various location where these cars could be placed.

It appears that some of the location there are too many car locations and many in the community are complaining.

Lyle Blackwood will take back to DOT of the problems with the Car Share program and get back to the committee.

There is one Action Item which is the approval of the Convent Avenue Baptist Church Senior Center for the NO PARKING SIGN in front of the senior center for the convenience of wheelchairs.
