

Health and Environment Committee

Community Board 9

Monday, February 5, 2018

Location: 18 Old Broadway

Meeting called to order at 6:30pm

Presentation of Dr. Michael Rosenbaum from Columbia University Medical Center F.I.T. program

This program is for overweight /obese children. 42-48% of children in our community are overweight. They also do research on children in this category. They see high cholesterol, diabetes and high blood pressure in these children. The program provides all of their care in one spot and the doctor is trying to get all of the pediatric providers to join in the program. He came to the community board in order to seek our help in locating providers. I have agreed to reach out and find people who would be interested in working with them.

The health Committee is now part of the partnership with Community Board 10 and the Harlem Business District addressing the issue of Litter in our community. LaQuita Henry is our official representative.

Meeting adjourned at 8:00pm

ATTENDANCE:

Monica Dula excused Carole Singleton and Miriam Aristy-Farer
