Chair Report November 10, 2016

We have recently witnessed what is sure to be a historical moment in the records of America when Donald Trump was elected as President. There are many issues that he ran on that served to deeply unsettle us -- from the racial overtones, to attacks on immigrants and Muslims as well as women and the disables. After taking breath, we must remain committed to continue to protect, strengthen and advocate on behalf of our community.

We are pleased to see that the hard work the Housing and Land use Committee has dedicated to raising awareness around the issue of affordable housing, especially concerning HDFCs. Interests continue to remain high as the informational and forums developed to engage and encourage shareholders into stronger financial footing continue to assist owners. CB9 has acted in a leadership manner on this matter and is encouraged to see neighboring boards also engage in activities that serve to educate and advocate for stakeholder rights.

The Borough President has partnered with the Latin2Latin to draw attention to the diabetes crisis in the Latino community and highlight healthy lifestyle choices needed to prevent diabetes. Together with the other Community Boards 3 – Lower East Side, 9-West Harlem, 11- El Barrio, 12- Washington Heights and Inwood whom currently have the largest Latino population, host a free screening testing event. Further information will be forth coming.

The Community Board Leadership Development Series will cover topics that will be useful to both newly-appointed Community Board members and experienced members. Sessions will be held at the main MBPO office at 1 Centre Street, 19th Floor South, or at the Northern Manhattan Office, 431 W. 125th Street as noted below. Sessions are open to the public, but all must <u>register online</u>.

These are the latest North River WWTP formaldehyde sampling data, which was sent to NYS DEC.

North River Formaldehyde Sampling using NIOSH 2016, Analyized by HPLC of Solid Sorbent Tubes
